PROFILE

I am a recent graduate with a degree in IT and a passion for software development. Through my academic coursework , I have gained experience in software development methodologies, programming languages such as Java and web development frameworks. During my college time, I participated in several hackathons and personal projects where I developed mobile applications and web-based tools using the latest technologies. I am excited to bring my skills and passion for software development to a dynamic team of engineers and contribute to building innovative solutions that impact people's lives.
